NAVIA HIGH AND HEAVY LOGISTICS

Boasting one of the most experienced teams in the industry, Navia High and Heavy Logistics has the people and scale to offer a Door to Door solution, ensuring cost effective, damage free delivery of your product to and from anywhere in the world.

HEAVY EQUIPMENT EXPERTS

Whether you have a single machine or need a whole vessel chartered for a large shipment, Navia High and Heavy Logistics will move your heavy equipment on time, on a budget and most importantly safely. We have close relationships with all major roll-on/roll off (RoRo), break bulk carriers, transport and crange providers within the High and Heavy Industry.

HEAVY HAULAGE:

We can handle all of your heavy haulage needs from a mini-excavator through to enormous mining, construction, gas and oil equipment, anywhere in Australia. The only limit is what the road can handle.

Chain of responsibly legislation is one of our top priorities and we appreciate it is a major concern for you. Therefore if our own truck isn't handling the load then you can be rest assured that all of our subcontractors have complied with our strict safety and insurance standards. If they don't-we won't use them no matter what!

TRACK & TRACE

All shipments can be tracked online via our NaviTrack customer portal which also interfaces with our international forwarding Systems. Offering an intergrated client facing order management and reporting system which provides customisable order details, summary and management reports. Real time information backed to our own specialised freight software.

CUSTOMS

Navia High and Heavy Logistics are licenced customs brokers, processing the expertise and resources to rapidly arrange the correct documentation to comply with the requirements involved with the numerous approvals for the importation and clearance of heavy machinery. Moreover, we ensure your machinery are customs cleared before the vessel docks as well as quarantine inspected within 24 hours. This results in you (or your customer) to take delivery sooner.

QUARANTINE COMPLIANCE

Australia is known to have the strictest quarantine laws in the world, followed by New Zealand. Quarantine bodies inspect cargo and in many countries have to power to impound contaminated equipment and demand additional cleaning. In Australia, AQIS (Australia Quarantine and Inspection Service) insists cargo arrive in a "clean as new" state. If your cargo is too contaminated they may order a re-export at your expense.

As well as organising paperwork, our quarantine consultants perform pre-shipment cleanliness inspections. This ensures that your equipment meets quarantine standards for entry before it's shipped.

With the extremes of quarantine standards around the world it can be confusing for both the shipper and importer. Navia High and Heavy Logistics takes on the obligations for you and ensures you have no quarantine problems or delays.
